DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
 - I. Claims 1-10, drawn to an interspecific *Nicotiana* hybrid, classified in class 800, subclass 317.3, for example.
 - II. Claims 11-13, drawn to a method of producing a backcross progeny from interspecific *Nicotiana* hybrids comprising selecting a recurrent parent based on biomass greater than the primary interspecific hybrid, classified in class 800, subclass 269, for example.
 - III. Claims 14-18, drawn to a method of producing a backcross progeny from interspecific *Nicotiana* hybrids comprising selecting a recurrent parent based on capacity for high level expression of systemic protein from a viral vector, classified in class 800, subclass 266, for example.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the interspecific *Nicotiana* hybrid of Group I can be used in a materially different process than that of either Group II or Group III, such as in a plant transformation method.

3. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because the method of Group II has different starting materials and different end products than the method of Group III.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject matter, and because the search required for one of the groups is not required for another, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete within one month (not less than 30 days) must include an election of the invention to be examined even though the requirement be traversed (37 CFR § 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David H. Kruse, Ph.D. whose telephone number is (703) 306-4539. The examiner can normally be reached on Monday to Friday from 8:00 a.m. to 4:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Amy Nelson can be reached at (703) 306-3218. The fax telephone number for this Group is (703) 872-9306 Before Final or (703) 872-9307 After Final.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group Receptionist whose telephone number is (703) 308-0196.

A handwritten signature in black ink, appearing to read "David H. Kruse". The signature is fluid and cursive, with the first name "David" being more prominent and the last name "Kruse" following in a similar style.
